

test

$$1-1=0$$

we have an issue,connected with luamode of tagpdf package,if the next not inline formula will be inserted emmediately after not inline formula,so we should insert some text before the next formula

$$a+b=a^b$$

$$a-b=a/b\ \$$$

$$a^b=0\$$$

$$a=\sqrt{c^2-b^2}$$

$$\alpha+\beta=1$$

$$\alpha-\beta=0$$

$$a-1=b$$

$$a\%b=0$$

$$b$$

$a^2-b^2=(a+b)*(a-b)$
\$ \gamma+\beta=1\$ this formula was probably inaccessible for screenreaders,at least nvda ignore it,because we switch off preprocessing,but after this formula a new formula should be accessible,because we switch on preprocessing again
 $\gamma-\beta=0$
 $\$sqrt{\alpha+\beta}=\sqrt{\alpha-\beta}$

$$\int\limits_a^b f(x)dx$$

and
 $1+1=3-1$
 $\$a/b-1/b=0$
\$
